

*“After evaluating a large number of potential partners to optimize our business and accelerate our growth, Angeles demonstrated the most thoughtful and collaborative approach to create value for all stakeholders. Angeles differentiated themselves as the best partner for Primus to further enhance our position as a leading precision components supplier in AD&S,” said Randy Brodsky, CEO of Primus Aerospace. “The Angeles team has significant experience partnering with businesses in which they invest to achieve their full potential. We believe a great future lies ahead for Primus and look forward to partnering with Angeles.”*

[Houlihan Lokey](#) and [Brownstein Hyatt Farber Schreck, LLP](#) served as the financial and legal advisors, respectively, for Primus. [FocalPoint Securities, LLC](#) and [Simpson Thacher & Bartlett LLP](#) served as the debt placement agent and legal advisor, respectively, for Angeles.

#### **About Angeles Equity Partners, LLC**

Angeles Equity Partners, LLC is a private equity firm that invests in companies across a wide range of sectors and specifically targets businesses which it believes can directly benefit from the firm’s strategic, operational, and M&A capabilities. The Angeles skill set drives the firm’s investment philosophy and, in its view, can help businesses reach their full potential. #### **About Primus Aerospace**

Founded in 1998, Primus delivers the most complex products, including hypersonics for defense, heavy launch and rockets for space, and avionics for commercial aerospace top airframers. Value-added services include exotic alloys expertise, engineering design support, component manufacturing, assembly and integration, and complete build-to-print program management. Advanced manufacturing capabilities include 3D printing, 5-axis complex machining, electrical discharge machining, heat treatments, helium leak checking, and water jetting for traditional and exotic materials used in hypersonic and space programs. The experienced team at Primus produces precision parts to very tight tolerances for quality, capacity, cost, weight, and complexity. The company is dedicated to innovation and differentiated by service quality, efficiency, and value engineering.
